Become an RSMeans data Certified Professional

Stand out from the crowd

GORDIAN ®

The RSMeans data certification program allows you to differentiate yourself and your organization when it comes to full-scale construction estimating and mastery of RSMeans data, the construction industry standard for reliable costs.

For New Estimators and Established Veterans

This program is for all levels of construction industry professionals, from novices to seasoned users of RSMeans data. No matter where you are in your career, you'll take your expertise to a whole new level.
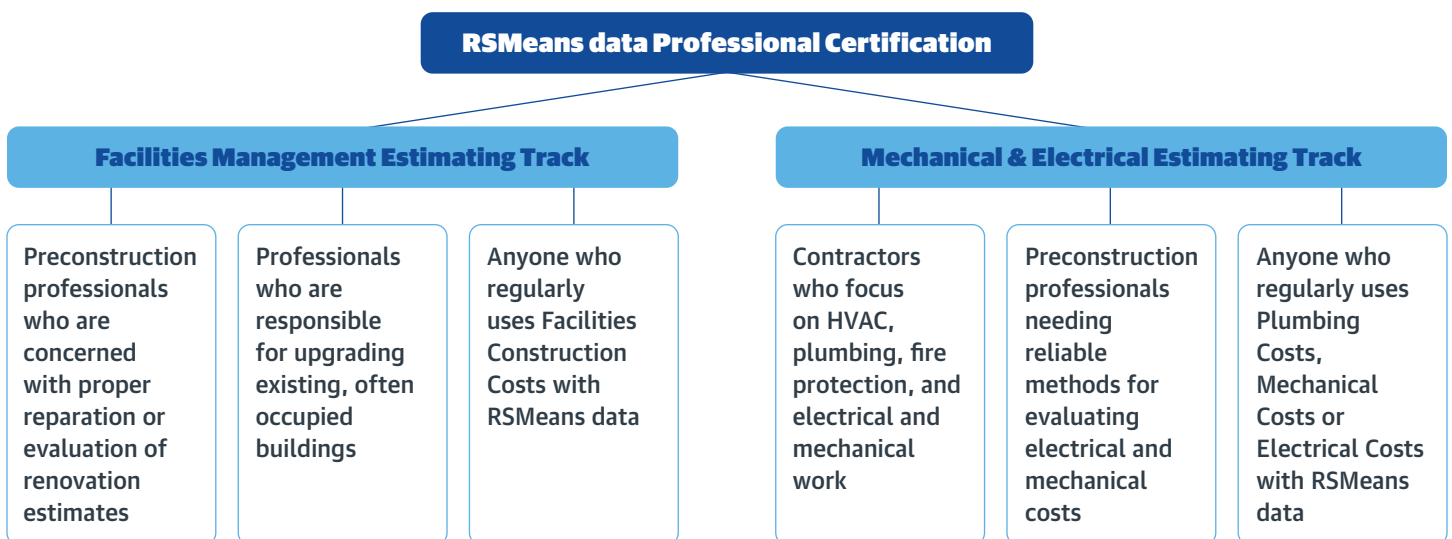

Demonstrate Your Expertise

Give your employers and your clients confidence in your construction estimating expertise.

Three Steps to Certification

1 Sign-up for a Knowledge Track. This series of training courses should align with your field of work.

2 Attend and complete the training events. Then review the recommended resources to prepare for the certification exam.

3 Take the RSMeans data certification exam. After passing the exam, download and share your certificate of achievement!

Customized Training Tracks for Your Field of Work

Add specific disciplines to your training experience with our Knowledge Tracks. Choose the track that best bolsters your skills after completing the baseline Maintenance & Repair Estimating course.

RSMeans data Professional Certification

Facilities Management Estimating Track

Preconstruction professionals who are concerned with proper reparation or evaluation of renovation estimates	Professionals who are responsible for upgrading existing, often occupied buildings	Anyone who regularly uses Facilities Construction Costs with RSMeans data

Mechanical & Electrical Estimating Track

Contractors who focus on HVAC, plumbing, fire protection, and electrical and mechanical work	Preconstruction professionals needing reliable methods for evaluating electrical and mechanical costs	Anyone who regularly uses Plumbing Costs, Mechanical Costs or Electrical Costs with RSMeans data

As you complete individual courses within a given Knowledge Track, you also earn continuing education credits (CEC) from some of the most prestigious industry organizations, including the American Institute of Architects and the Association for the Advancement of Cost Engineering.

The Certification Exam

You'll have three hours to complete the 100-question certification exam. The exam includes a mix of true-or-false and multiple-choice questions based on the 13 modules that will be discussed during training. Participants will have two attempts to pass the exam with a minimum score of 75%. You may use your course materials during the exam including your notes, cost book or online software and other course materials.

RSMeans data Certification: Credibility the World Can See

After passing the RSMeans data certification exam, you will access resources to share your accomplishments. You will receive an electronic certificate of achievement along with an "RSMeans data Certified" logo that can be used on business cards, in email signatures and on social networking sites to showcase your credentials.
