

Assemblies Costs

with RSMeans Data

A photograph of a modern skyscraper under construction against a blue sky with white clouds. The building's facade is made of large glass panels with a diamond pattern. In the foreground, there's a view of a construction site with a crane, scaffolding, and concrete structures.

Reference Section

All the reference information is in one section, making it easy to find what you need to know and easy to use the data set on a daily basis. This section is visually identified by a vertical black bar on the page edges.

In this section, you'll see the background that relates to the reference numbers that appeared in the Assembly Cost Sections. You'll find reference tables, explanations, and estimating information that support how we derive the systems data. Also included are alternate pricing methods, technical data, and estimating procedures, along with information on design and economy in construction.

Also in this Reference Section, we've included Historical Cost Indexes for cost comparison over time; City Cost Indexes and Location Factors for adjusting costs to the region you are in; Reference Aids; Estimating Forms; and an explanation of all Abbreviations used in the data set.
